**Subject:** Heads up - SEMS release put on hold due to Gold King Mine situation

As you know, we are scheduled to go forward with SEMS 1.7 this weekend, which involves taking the system being offline from 8pm tonight thru Sunday. This is the release that will move obligation planning out of Primavera and into the Site Management Module.

Region 8 has asked that we postpone the release because they are very much in need of access to SEMS over the weekend, primarily for document searches. Given the importance of the situation there, we made the decision to postpone the release.

The SEMS Reference Desk will be sending out a message to all users shortly to alert them to the change. Steve and team are working with the NCC to determine a possible date for rescheduling. We will of course be balancing that against feedback from the region on when they will complete their most urgent document searches.
